#### THE FIFTH DAY AT CHICAGO.

How the Convention Looks, and What It Is Doing To-Day.

ISPECIAL TO THE EVENING WORLD. CHICAGO, June 28.—The delegates cordially dislike the early morning sessions, and on this close, stuffy morning they come into the convention slowly and late. At 10 o'clock, the hour for assembling, not | party.

one-fifth of them were on hand, and those who were looked particularly tired and There had been late and exciting caucuse

There had been late and exciting caucuses in most of the delegations and sleep had been a luxury that few had enjoyed.

The galleries were jammed beyond their capacity, just as they were yesterday, and worse, the reckless policy of issuing tickets right and left having gone on unchecked.

There is every prospect of another blustering day in and out of the convention.

Only half a dozen New Yorkers were in their seats at 10 o'clock, Judge Robertson the most punctual among them all. They had very little to say about the action of the delegation to-day, but intimated it was to be as outlined last night.

The general expectation was that to-day would see a mighty struggle and some big changes.

would see a mighty struggle and some big changes.

The talk is that the contest has narrowed down to Allison, Alger and Harrison, with the latterperhaps in the lead.

The Allison and Alger men were both very confident, claiming heavy gains from the bursted Gresham boom and from the weaken-ing Sherman forces.

DEPEW AND HIS PAN.

They asserted that they would have sixty votes solidly from Pennsylvania before the day was out, and that Nebraska and Minnesota had come to their rescue.

The talk among the delegates in the hall about adjournment was not very encouraging to those who are getting impatient to be home. The general opinion was that to finish the business to-day was out of the question. Very many said that even Monday would see no adjournment, and at least one session Tuesday would be necessary. One expressed a belief that a nomination would be reached to-day.

a belief that a nomination would be reached to-day.

Senator Hiscock and R. G. Horr, of Michigan, had a close conference on the floor before the convention came to order.

Col. Ingersoll's usual seat on the platform was vacant this morning.

Mr. Depew was a quarter of an hour late, but he got a good round of applause when he did come in.

Several persons came into the gallery bearing flags, evidently with the idea of being ready for a repetition of last night's demonstration.

demonstration.

Charles Emory Smith, of Philadelphia, was busy among the New York delegates while the Chairman was waiting for the convention to come to order. He shook hands cordially with Mr. Depew, and so did many others.
Chairman Estee had taken the chair at first, but his voice was too husky and uncertain, and when he called Senator Warner Miller, of New York, to take his place, there was hearty applause.

hearty applause.

Mr. Miller pounded the desk with sledge-hammer blows, and succeeded in getting order. THEY COMBINED AGAINST HARRISON.

But the Friends of the Other Candidates Did Net Agree on Any One.

[SPECIAL TO THE EVENING WORLD.] CHICAGO, June 23.—Three days ago the

bination, too. It includes Ohio, Pennsylvania, Iowa, Illinois, Michigan, Maine and the Pacific coast States, and is backed by the supporters of Sherman, Blaine, Allison, Alger and Gresham.

This anti-Harrison combination was agreed upon at 2 o'clock this morning. Among

those taking part were Police Commissioner French, of New York, who represented the anti-Harrison people of the New York delsgation; Edward D. Hayden, of Massachu setts; Samuel Fessenden, of Connecticut; setts; Samuel Fessenden, of Connecticut;
Senator Aldrich, of Rhode Island; Congressman McKinley and Butterworth, Green B.
Raum, Gen. Powell Clayton, of Arkansas; M. H. De Young, of California; Henry O. Wolcott and William A. Hamill, of Colorado; Senator Farwell, of Illinois; John S. Clarkson and Congressman Henderson, of Iowa; John S. Wise, of Virginia; Col. Hecker, of Michigan; Senator Hale, of Maine; Senator Jones, of Neyada; ex-Gov. Foster, of Ohio; John R.
Lynch, of Mississipi; John M. Thurston, of Nebraska; Senator Quay, of Pennsylvania, N. W. Cuney, of Texas.

The Blaine Men Favored Allison.

THE BLAINE MEN PAYORED ALLISON. The claims of all the candidates were advo-The claims of all the candidates were advo-cated by their respective friends. It was not the intention to agree on any one, and it was evident that such a result could not be achieved. Mr. Allison was highly spoken of by nearly all the representatives of what might properly be termed the Blaine element in the convention. Clarkson, of Iowa: Hayden, of Massachusetts: Cuney, of Texas; Fessenden, of Connecticut, and others insisted that he was the most available man. Senator Farwell, Lynch, of Missis-sippi, and one or two others declared that Judge Gresham could be nominated, and be elected too, because he would unite the party.

THE CAMPAIGN EMBLEM FOR GRESHAM. Mr. Mckinley, being bound to Sherman, was not at liberty to act further than to do all he could to prevent a stampede. No at-tempt was made to consolidate all the forces upon any one candidate.

SHERMAN HAD NOT GIVEN UP HOPE. Senator Sherman had telegraphed his friends during the afternoon that they must stand by him, and the friends of the other candidates feit under similar obligations to the gentlemen they have been supporting. It would have been impossible therefore to have combined on any one man, and it the supporters of any of the candidates went into the meeting hoping that their friend would be selected for the support of all, the hope was soon dispelled.

NO BOSSISM FOR NEW YORK WANTED. The one idea expressed in the general dis-cussion was that the proposition of the bosses of New York to name the nominee must be defeated first, and the other candidates take

defeated first, and the other candidates take their chances of success after that. The conference to be held after adjournment to-day may have something to do with candidates.

During the meeting this morning the statements Patrick Ford had been making about Harrison and the Irish vote of New York were repeated. They were to the effect that Harrison's Know-Nothing record had been investigated, and that it would be certain to alienate the whole Irish vote of New York, which was now drifting towards the Henubwhich was now drifting towards the Repub

licans.
This will probably stagger some of the New Yorkers who have been talking about his ability to carry New York. Taken along with the Chinese record on the Pacific Coast, it may be a significant factor.

GRESHAM'S GRANGERS WILL STAND BY HIM. The eleven Gresham men in the Minnesota delegation will not desert their favorite. They consider Judge Gresham's chances as good as ever and declare their intention of standing by him to the end. The supporters of the other candidates do not consider Judge Gresham's favoring the constitution of the control of the contro

Gresham a factor in the convention.

Col. Ingersoll's speech last night injured what chances Gresham had. The Colonel was invited to address the convention, and he turned his speech into a Gresham speech. The friends of the other caudidates charge Col. Ingersoll with abusing the privilege granted him.

THE BLAINE PEELING GROWS STRONGER. All day long and last night the figure of Blaine became more and more apparent. There is no longer any doubt that there is still a plot to nomnate the Plumed Knight. The 'Blaine or Busters' are beginning to The "Blaine or Busters" are beginning to show their hands in a more open and aboveboard manner. There is now hidden away in the cellar of Convention Hall a new, huge floral picture of James G. Blaine.

The Californians have appointed a committee of fifty to carry it into the convention at a given signal.

\$5,000 Drawing. friends of Depew, Harrison, Alger, Gresham and Allison were afraid of John Sherman's strength and were ready to combine at any time to prevent his nomination. The combination has now shifted, and it is organized against Harrison. It is a mighty strong som-

MOTHER MANDELBAUM'S SON. Julius Has Tired of Canada and Is in a Fal-Way for Sing Sing.

"Mother" Mandelbaum bobs up serenely again before the New York public after an absence of nearly four years from the scenes of her youth and the celebrated "fence' she kept for twenty years at Rivington and Norfolk streets. Yesterday her son Julius, a young man of

twenty-six years, who is under indictment for being an accessory of his mother in receiving stolen property from shoplifters and other thieves, suddenly appeared before Judge Martine to renew the bail which he had jumped in 1884 when his mother fied to

had jumped in 1884 when his mother fied to Canada.

Judge Martine refused to entertain the matter at all, on the ground that he had acted upon the case when District-Attorney, and Lawyer Moss, representing Howe & Hummel, counsel for Mrs. Mandelbaum, thereupon took their innocent client before Judge Andrews.

It appears that all the necessary pipe was laid for Julius's return about two months ago, and on that understanding the bail was renewed, the bond of \$5,000 being signed by Fanny Bloch, of 209 East One Hundred and Second street, and Morris Isaacs, of 230 Suffolk street.

It is believed that this step is preliminary to a move to get Mother Mandelbaum here and secure her release. She is living in the very quiet little city of Hamilton, Ont., about forty-four miles west of Niagara Falls, but does not seem to enjoy the loveliness of Burlington Bay and the frog marshes of Dundas.

She longs for the scenes of her childhood in Rivington street, and beligging in the

Dundas.

She longs for the scenes of her childhood in Rivington street, and, believing in the clever skill of her counsel, thinks she would rather take her chances of going to Sing Sing or Clinton than living in exile in a foreign

land.
It will be remembered that Detective Frank, of the Pinkerton Detective Agency, did a elever piece of work in ferreting out the "fence" work of Mother Mandelbaum and her son and Herman Stoud, who was chief clerk for the "fence."

Frank bought some of the stolen goods taken by shouliffers from Simon Orange.

Frank bought some of the stolen goods taken by shoplifters from Simpson, Crawford & Simpson's, Le Bouuillier Brothers, Hearn's, Stern Brother's and other drygoods houses. These goods hore a private mark by which they were easily identified. They will be placed in evidence against Julius Mandelbaum when his case comes up for trial, which will not be before the fall term, according to information received from the District-Attorney's office.

An Evenna Wonth reporter saw Robert Pinkerton to-day and he said he could in a short time produce the required testimony that would make out a strong case against Julius Mandelbaum, which he believed would convict the young man.

Young Mandelbaum, waich he believed would convict the young man.

Young Mandelbaum could not be found to-day, but his lawyers say he will be on hand at any time when the court requires

"Why Philadelphia papers?"

"Because my wife has relatives there."

"Oh, she is with her relatives then?"

"Yes. I don't fear for her safety or care, but I want to know where she has gone to. I am going to Europe in a short time."

Mr. Ewing rents his room from Mrs. Lasson, who leases the top story of the building. Mrs. Lasson was about to tell the reporter more about the case when Mr. Ewing appeared in bare-feet and gauze undershirt.

The "Good-day" of the reporter was answered by a sentence in which William Henry consigned the newspaper man to a much hotter place than the noonday Bowery.

William Henry Ewing is about thirty years old, and to-day he lies sweltering off his wrath in his room on the top floor of 236 Fifth avenue.

He is very angry because he can't locate his wife and because he thinks a newspaper has done him an injustice.

"Yes, my wife has gone, and, what is more, she has been gone since last April," he said.

"Eloped, or abducted?" asked the reporter.

For the 22d of June, the highest temperature on record is 30 degrees in 1884. The highest temperature for June in seventeen years was 94 degrees on the 30th in 1872, and the lowest was 60 degrees on June 10, 1878. The highest temperature registered here yesterday was 91 degrees, but of course it was higher than that down in the streets.

This morning there has been a fall of temperature all over the coast and the lake region, and it can't be very long before the wave reaches the seaboard. I look for it any time after 8 o'clock this afternoon, but it may not come till 9 or 10 o'clock to night. At any rate, I think we can predict very respectable weather for to-morrow.

THE TROUBLESOME HUMIDITY. "What makes the heat to-day so intolerable is the humidity. The percentage this morning was 81, while the thermometer registered only 78. I say only, because it is a very unusual thing for the humidity to be so high at that temperature. The average humidity is about 65. It ought to be about 45 to-day, in order to counteract the effects of the heat."

of the heat."

The temperature in New York yesterday morning at 7 o'clock was 68. To-day the mercury had a start of ten degrees above this in the race, and the probabilities are, unless the cold wave begins to strike in before 3 o'clock, we may see it 100 in the shade this afternoon.

SHAMPOOS AND SODA. A rushing business was done by all the soda-water fountains uptown and downtown, and the barbers say that the number of shampoos up to noon was more than double an ordinary day's business in that branch of the

THE SOBER SIDE OF IT. Ambulances are busy to-day, and "insolation" is the diagnosis which goes on the hospital record in the great majority of the cases. This means nothing more than exhaustion from the heat, or what is generally known as

from the heat, or what is generally known as sunstroke.

As it is a natural cause of death, but a small per centage of the cases is reported to the Coroner's office.

Two only were reported yesterday. One was an unknown Italian, found dead on the stoop of 116 Mulberry street, and the other Thomas J. Supple, found dying on the pier at the foot of West Thirty-seventh street.

The bodies of both men were removed to the Morgue.

Two more cases were reported early this morning. They were Albert Kuhn, aged forty-five, of 107 Essex street, and Jose Cot, found dead at 29 Oak street.

Assistant Coroner O'Meagher said that while the deaths in which heat is the direct cause are very numerous, those in which it is only a contributory cause are much more so. The mortality among very young children, in particular, is very great.

IN THE TENEMENTS. The sudden hot spell is playing havee in the tenement-house districts, and is sending the death rate relatively as high as the There were 144 deaths on Wednesday, 28 of which are due to the warm weather. The average daily rate of mortality in the

ASCORCHER city during the week has been 125, fully one-sixth being directly traceable to the heat.

Yesterday there were fifteen cases of sunstroke reported, six of which proved fatal. ILLS BORNE ON THE HOT WAVE.

The effect of the continuous heat on the general health of the city, according to Dr. Edson and Dr. Nagle, who are veteran observers, is a steady increase in diarrhoal complaints and a tendency to scarlet fever, diphtheria and typhoid fever. They are on the wane, just at present, while cholera infantum, congestion and infimumation of the bowels and convulsions are on the increase. In the Bureau of Vital Statistics it is said that sickness is prevalent in those sections of the city where the people herd like cattle. The lack of proper ventilation and proper food make the children of the poor ready victims to the decomposition of the milk and other nourishments, and they sicken and die.

other nourishments, and they sicken and die.

"Infants brought up on the bottle suffer most," said Dr. Edsons, "The tenement-house inmates cannot afford to buy ace to keep milk cool, and the decomposition creates untold misery and consequent sickness and death. The summer corps of physicians make daily visits to the big tenements and do the best they can to save the children, but until overcrowding is done away with, and ventilation, air and sweet food are furnished, the little mounds in the gravevards will increase. It is a serious problem which health experts all over the world are trying to solve." over the world are trying to solve.'

THERMOMETRIC POINTS.

The following are the indications of Blakely's thermometer from 3 a.m. to-day to 11 o'clock:
3 a.m., 82 degrees; 6 a.m.; 80; 9 a.m., 86.
This is a raise of ten points over last year's record for the time.
At 11 o'clock it was 93½ degrees by Blakely's and 89½ by Hudnut's weather instruments.

"We both knew it," replied the virtuous young man with an income of \$60,000 a year, full of indignation at the baseness of Fu Long. Then he saided vigorously: "Of course I appeal. I never will pay it,"
Fu Long was made to understand that he had won the suit, and his dried and withered old face assumed a ghastly gr'n exceedingly like that of a Bowery mummy. His starred eyes watered, and then, finding that the plump and hearty Chu Fong was looking at him, his chops fell again and he looked like a smoked death's head again.
